

Goal is to apply some AXIOS-operations, changing modify some pages at frontend

- 1) AXIOS for page acupuncture, formulas, mm of tcm
 - a. Look to section acupuncture at <http://aivoluon.com:3500/acupunctures>

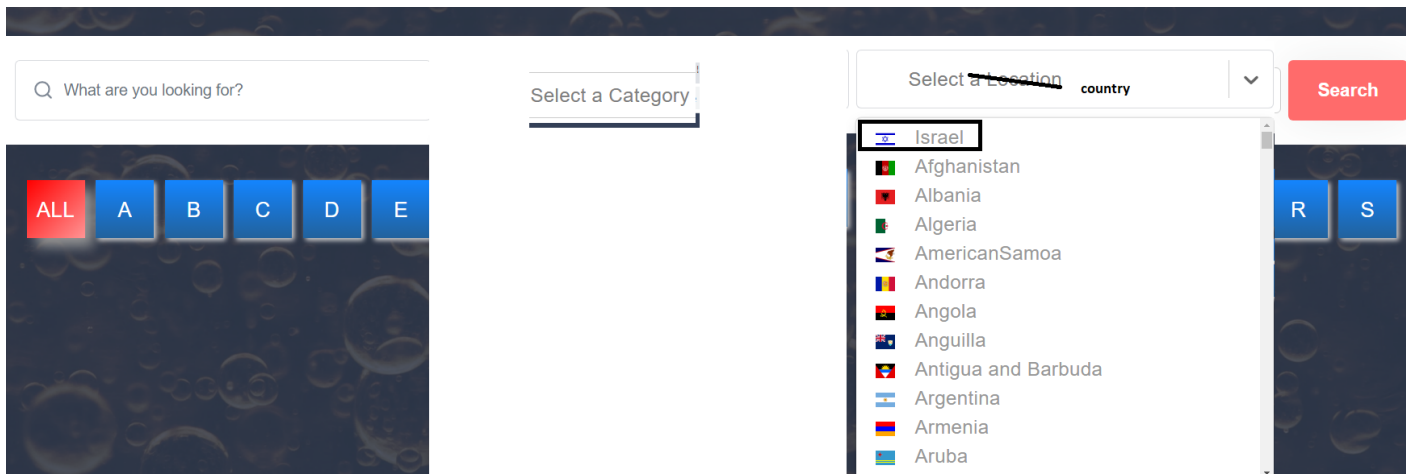

You see the data from collection acupuncture, fetching to page acupuncture. Now I want that data from collection formulas will be fetched to page formulas. Do it the same way it had been done for acupuncture. The single datarow, element of collection formulas will be fetched to a file named formulaprofile. Look to <http://aivoluon.com:3500/formulas>

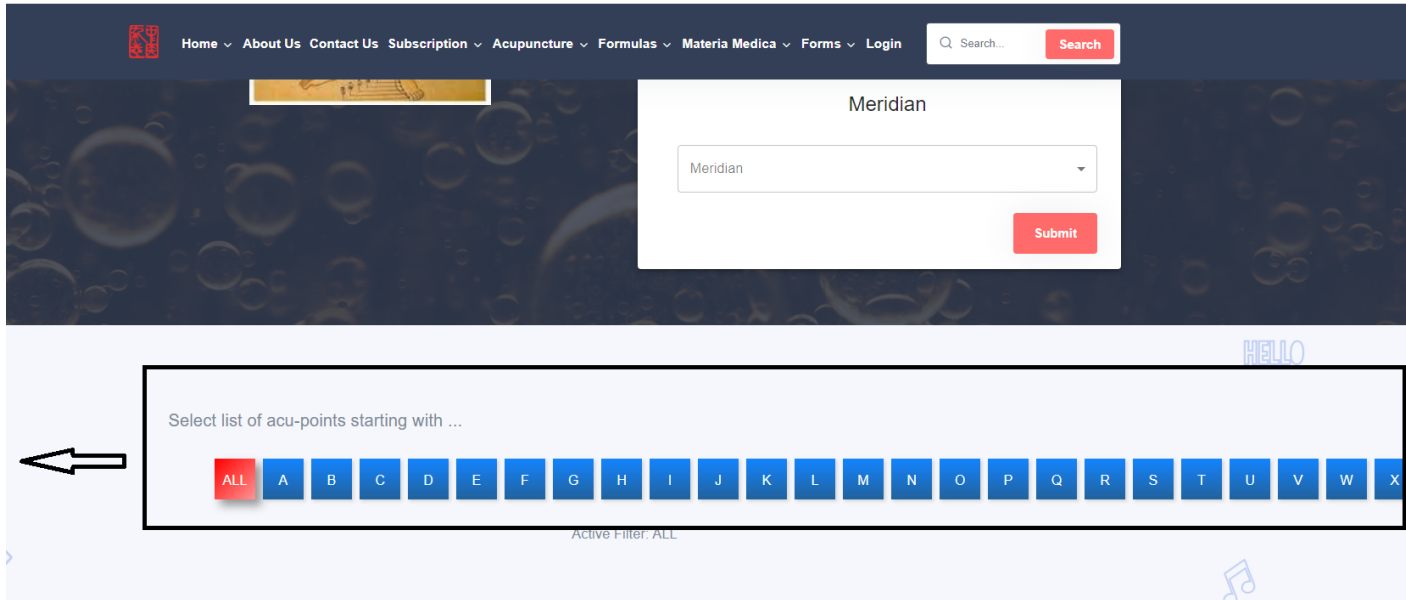

- b. Look to section acupuncture. You see the data from collection acupuncture, fetching to page acupuncture. Now I want that data from collection materiamedica will be fetched to page materiamedica. Do it as the same way it had been done for acupuncture. The single datarow, element of collection will be fetched to a file named materiamedicapofile. Fetching pics of the concerning mm to frontend-web page materiamedicapofile. First build head-page called materiamedica, which looks like acupuncture. With Alphabet All and A to Z.

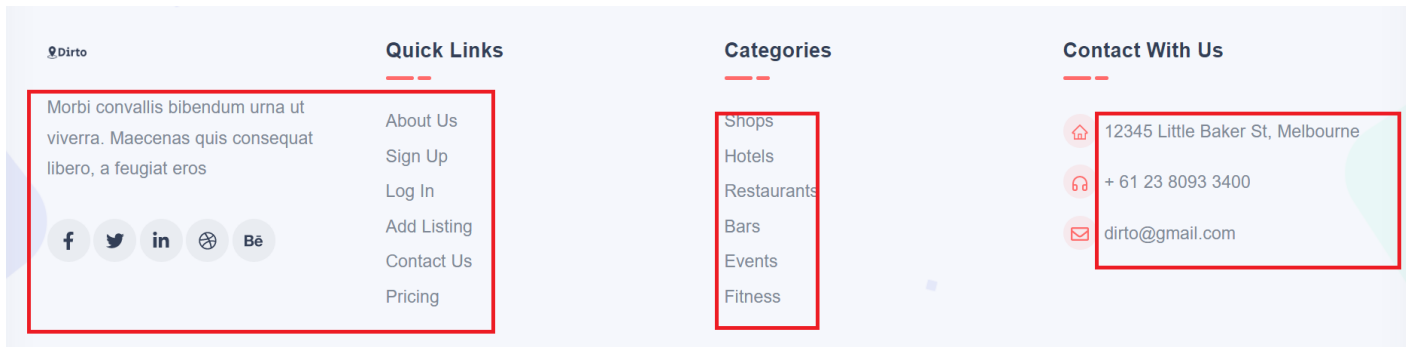

- 2) AXIOS for page mm of ayurveda
- 3) AXIOS for page mm of homeo
- 4) Handling email-processing of sites
- 5) adding the files forum into this public-frontend. Add menu-item called Forum. And fetch data from tables to it., created ,edit, quote topic, post have to be possible.Calling forum from menu , located in components/common/NavBar.
- 6) A. adding flags to file loginregister in dropdown country. This is file SelectCountry

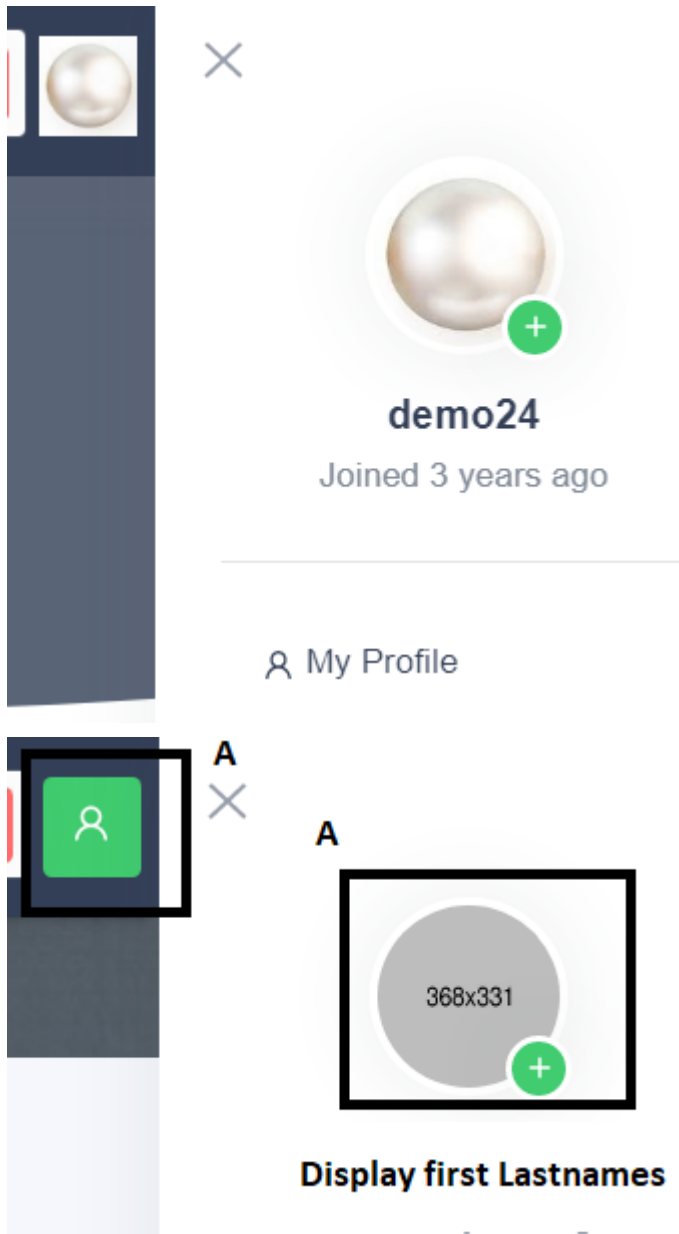

b. make the “alphabet” smaller and center it

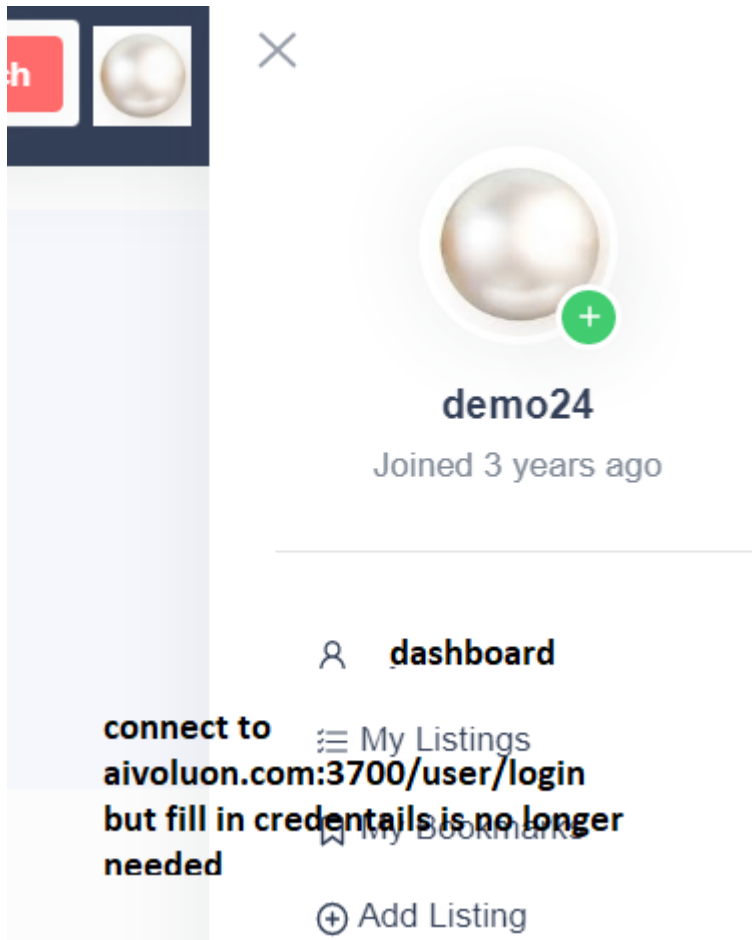

C. change the default color for font from gray to black for the whole site for all pages

7) A. after login I want to display/retrieve avatar and Names of user and display at A locations

b) implement the connection to backend.aivoulon.com/index by adding in this location B like in the image

When clicking on dashboard you will be get in <http://aivoluon.com:3700/user/login> , but filling the credentials is not needed, because you are **already login**

c) add dropdown of countries with flags in this search. Add also Alphabet here which will be used for filter of clinic-names

Discover the best places to stay, eat, shop & visit the city nearest to you.

dropdown

And replace the image "bread-bg2" by the next image

And keep the same file name

https://img.freepik.com/free-photo/grunge-vintage-old-paper-background_1373-431.jpg?w=1380&t=st=1679869116~exp=1679869716~hmac=b766f49eeca3ff55a04e33b9f55f941b85755d53dc0a49a38d08f30b16956024

8) fix it so I can create topic in pages acupuncture, formulas, materiamedica, forum , also on the sub pages of acu,form and MM
Not only create /edit/quote/ delete etc.
And make the next change in

9) fetching data from collection TermOfUse and PrivacyPolicies
Go to aivoluon.com:3900/user/login and module databases to see how it is in backend
<http://aivoluon.com:3000/user/login> (demo24,123321)
<http://aivoluon.com:3000/databases/privacypolicies/>
<http://aivoluon.com:3000/databases/termofuses/>
Endpoints are termofuses and privacypolicies

Fetch data of clinic into the corresponding fields of the business-card.

Checking if clinic is open/closed and fetch this info to left above of business-card. Retrieve workingHours of clinic, check with actual time and display Open or Closed.

Fetch businessName, Logo/Avatar, subBranch (not subCategory), address1,2,3, zipcode, city, country.

For phone,mobile,skype then phone, mobile will be called if user use phone. And for skype, skype will be started.

Button " request for appointment" will popup a modal to fill in First , Lastname, phone and date and timeslot with submit button. Timeslot is restricted to working hours with step of 15 min.

For datepicker disable past dates, so only date of today and in future.

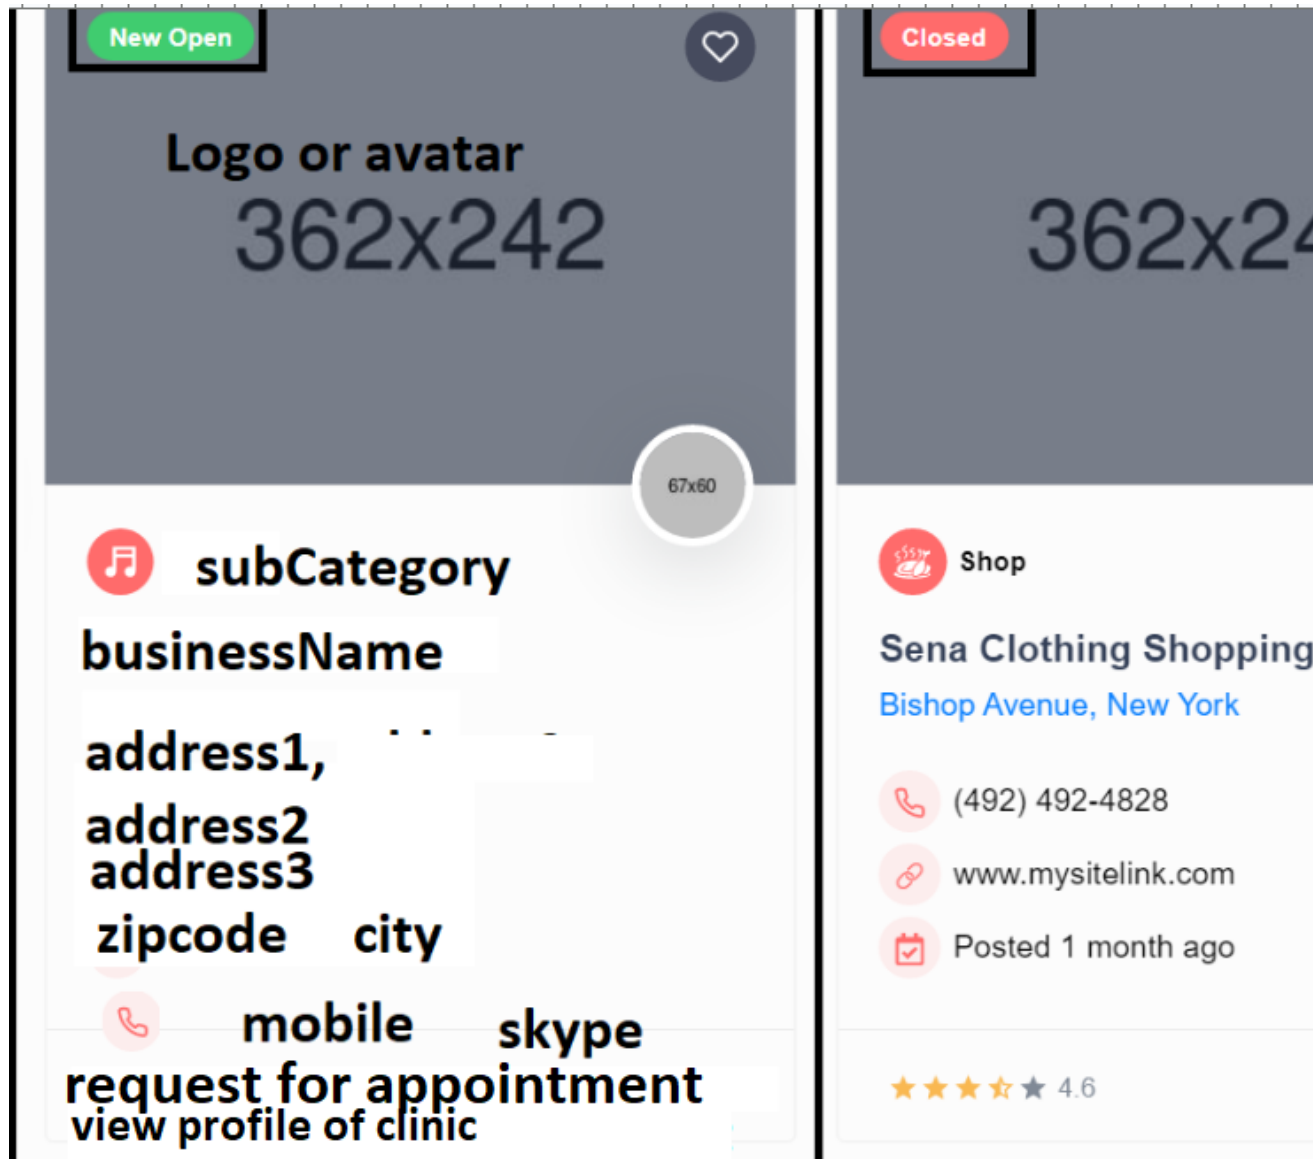

For timeslot-pickers we have two variables: preferStartTime and preferEndTime and preferEndTime will be preferStartTime+15 min as default.

preferStartTime

preferStartTime+15 min

**for example if start is 0:00 , then
endtime will be automatic display 0:15 as
default, but user can select endtime**

Clicking on View Clinic-profile, BusinessProfile will be called. Which is task 9B.
Display 6 businesscards in a page, implementation pagination.
In the next pic you see layout of an business-card

User can click on the phonenumber and the call can be directed.

. Integrate ([Call Me](callto://+1234567890)) for the phonenumber

<https://mycyberuniverse.com/create-html-link-that-starts-skype-call.html>

So this part "callto"dynamic retrieving phone-nr of each clinic" has to be different for each clinic

for skype skype will start, but it ask to fill in phonenumber. suppose is skype is a nick, then we will start chat-session immediately with that nick

B. Look to section acupuncture. You see the data from collection acupuncture, fetching to page acupuncture. Now I want that data from collection clinics will be fetched to page index. Do it as the same way it had been done for acupuncture. The single data-row, element of collection clinics will be fetched to a file named businessprofile.
